## User Manual: GearUp – An Online Car Booking Platform

**Hamna Ali**

**Bsef22m506**

# 1.Project Description

The Car Rental Website is an online platform designed to facilitate the rental of vehicles for personal or commercial use. It provides users with the ability to browse different car categories, check availability, and book vehicles along with optional services such as drivers, car washes, and event decorations. The system supports two main user roles: Customers and Admins, each with specific functionalities to manage bookings, payments, and inventory.

# 2.Workflow

1. **User Registration**: Customers create an account via the sign-up form.
2. **Login & Role-Based Redirection**:
    - Admins → Admin Panel
    - Customers → Customer Dashboard
3. **Car Browsing & Booking**: Customers can explore, add services, and book cars.
4. **Cart & Checkout**: Customers finalize the booking and get an invoice.
5. **Admin Operations**:
    - Add/update/delete cars
    - Manage bookings and view payments
    - Set prices for services

**Technologies Used**: ASP.NET MVC, C#, SQL Server, Bootstrap

# 3.User Instructions

## Customer:

1. Go to the **Sign-Up Page** and create an account.
2. Login using the credentials.
3. You'll be redirected to the **Customer Dashboard**.
4. Browse cars by category (Luxury, Economy, Coasters, etc.).
5. Select rental preferences:
    - Inside/Outside city
    - With/Without driver
    - Pickup/Home delivery
6. Add cars and services to the cart.
7. Review total cost and click **Book Now**.
8. Receive a downloadable invoice for your booking.

## Admin:

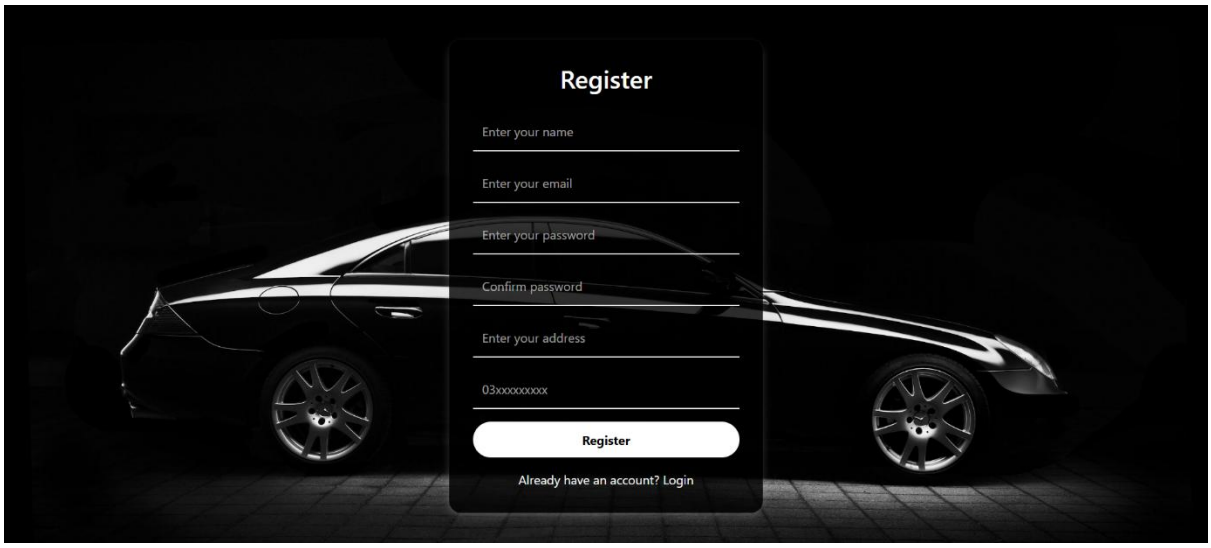
1. Login using admin credentials.

2. You'll be redirected to the **Admin Panel**.
3. Manage cars: Add, edit, or delete vehicle listings.
4. View and manage customer bookings.
5. Update service charges (Car Wash, Event Decoration).
6. View payment records and generate invoices manually if needed.

# 4.Screenshots with Instructions

### Step 1: Create an Account (Customer)

### Page Name: Sign-up Page

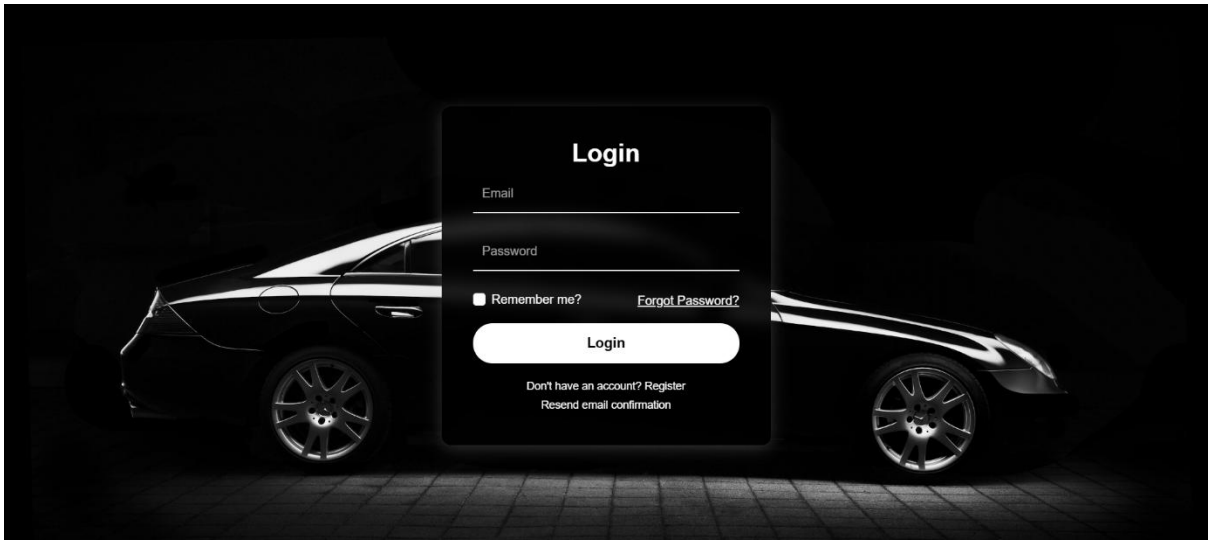


**Instructions:**

1. Open the website homepage.
2. Click on the "Sign Up" button/link.
3. Fill in the required details:
    - Full Name
    - Email Address
    - Contact Number
    - Home Address
    - Password
4. Click "Register" or "Create Account".
5. A confirmation message or redirection to the login page will appear once registration is successful.
6. *Ensure you use a valid email and remember your password.*

**Step 2: Login – Unified for All Roles**

**Page Name: Login Page**

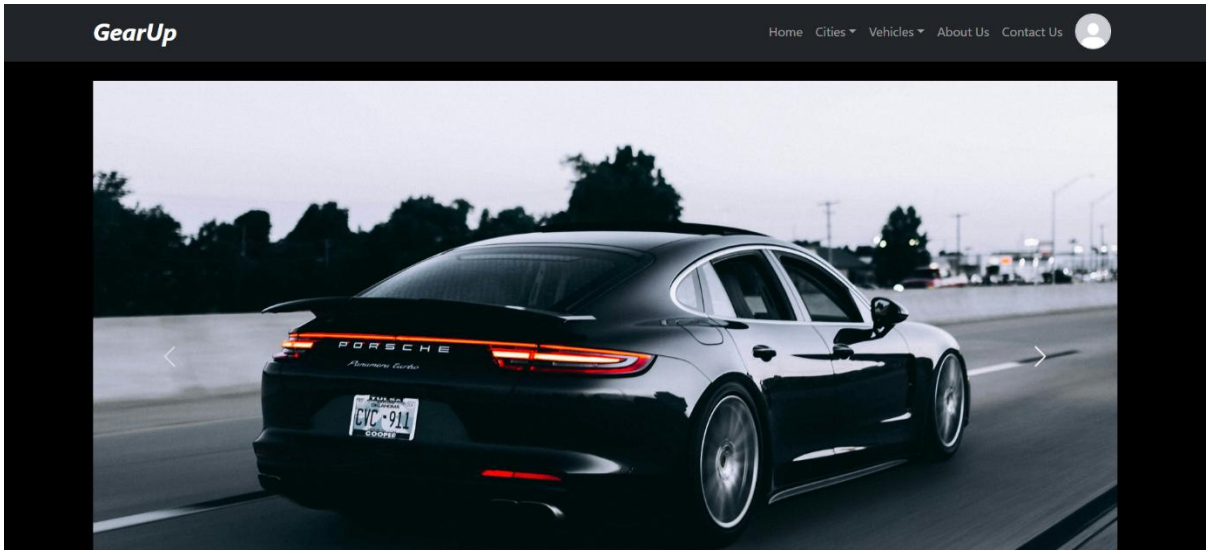


**Instructions:**

1. Navigate to the "Login" page.
2. Enter your Email and Password.
3. Click on the "Login" button.
4. The system will check your role and redirect you accordingly

**Step 3: Perform operations according to your role**

1. **Customer Module**
    - You will land to customer dashboard as you login



2. **Dynamic Home Page:**
    - Car slideshow for promotions and advertisements.
    - Featured & Discounted Offers.
3. **Car Rental System:**

    **Browse Cars by Category:** Luxury Cars, Economy Cars, Elite Cars, Coasters.

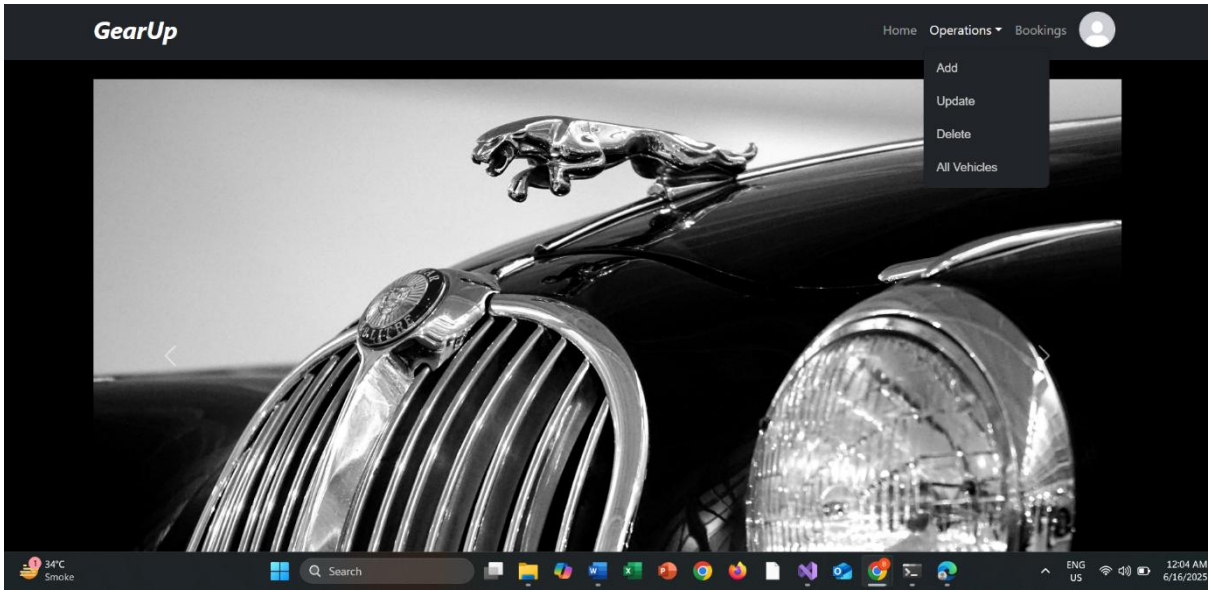
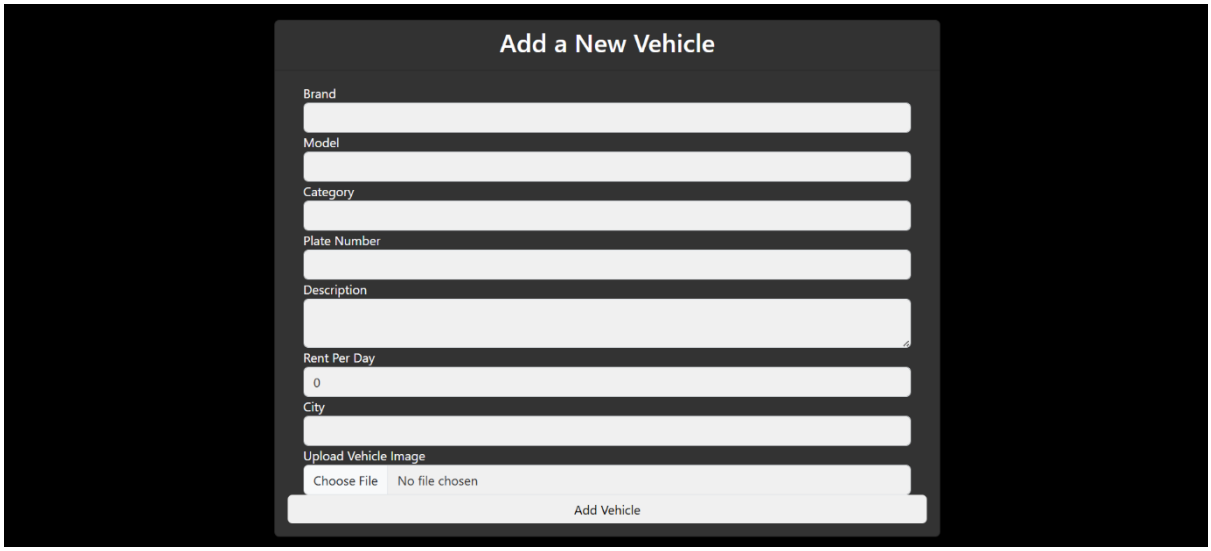
## 9. Admin Module

## 10. Customized Admin Dashboard

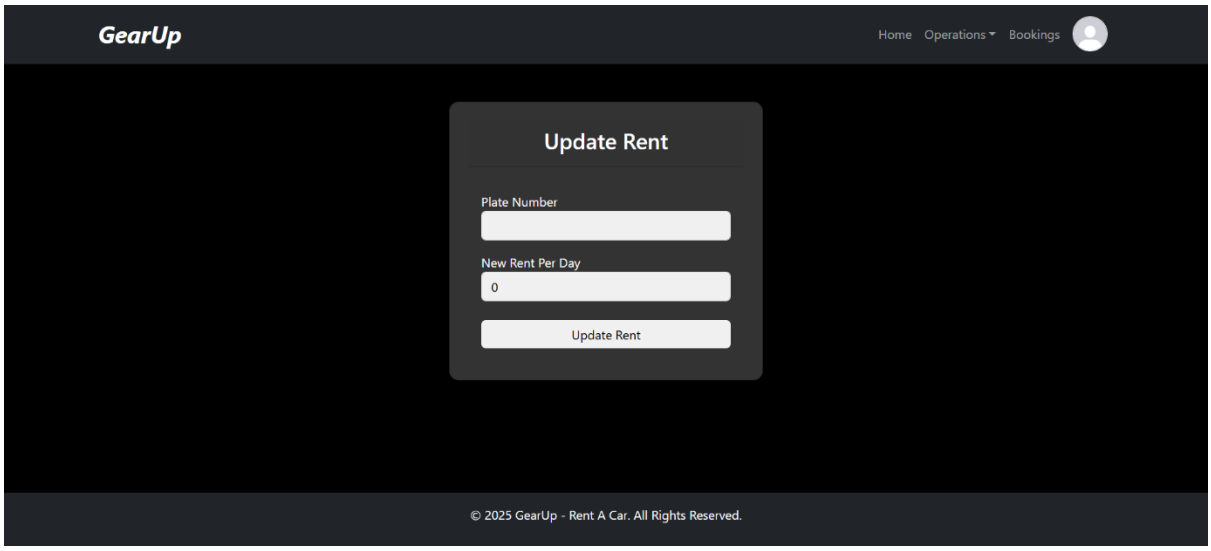


11. **Car & Inventory Management:**

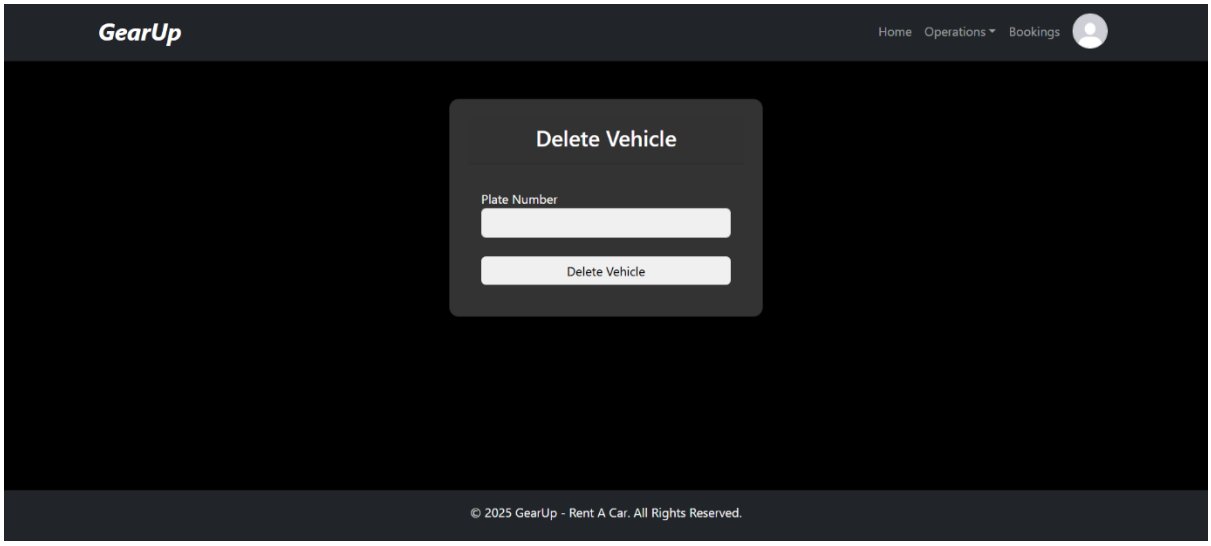
- Add a car



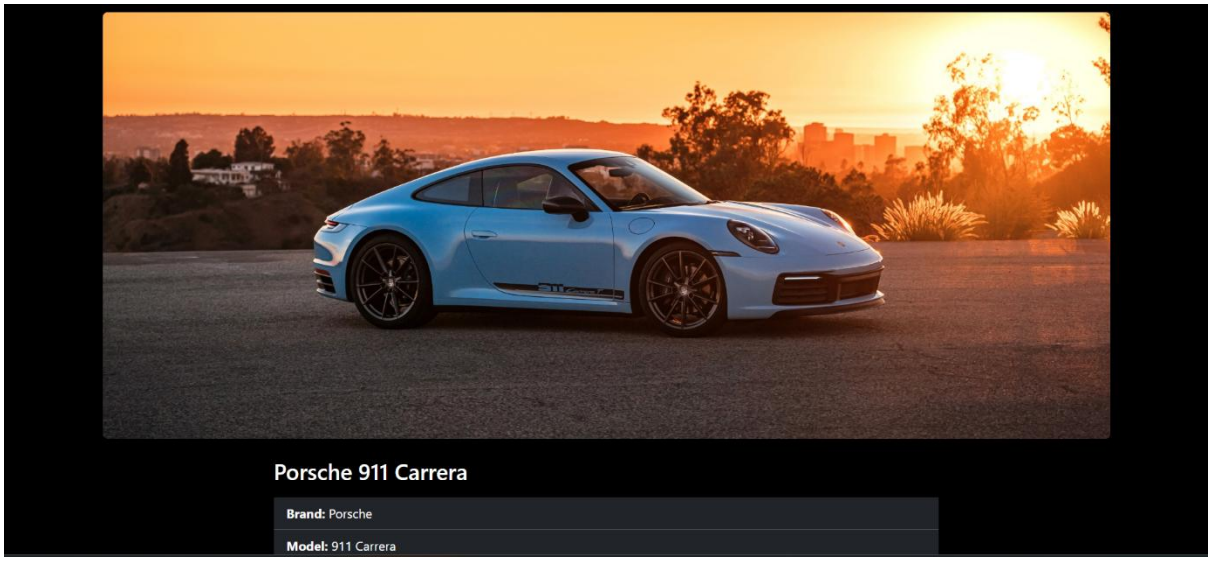
- Update a car

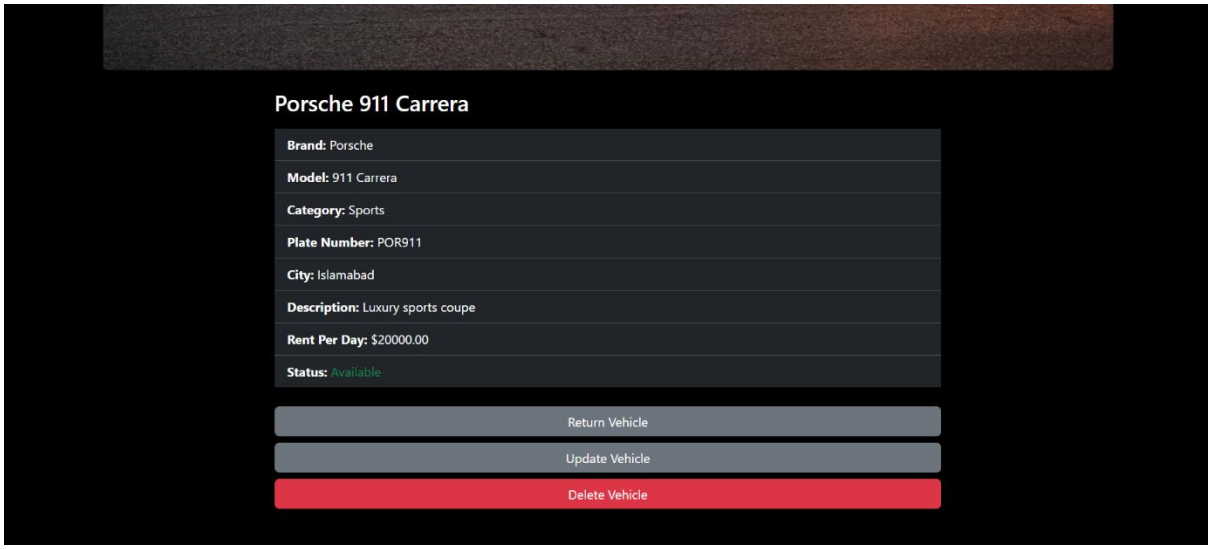


- Delete a car

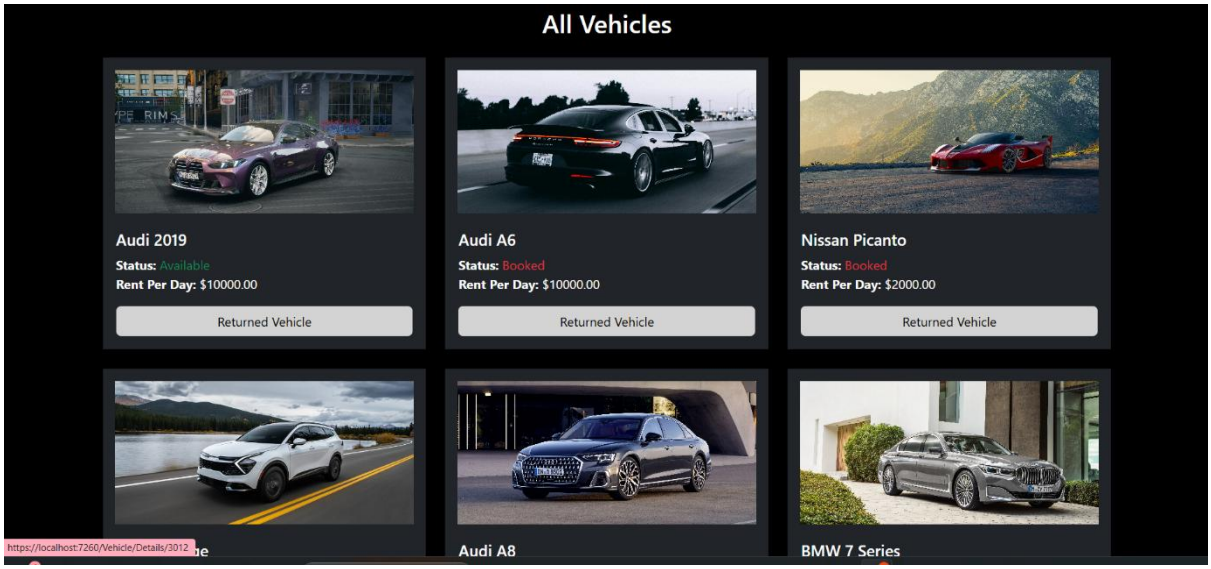


- Mention a car as Returned/ Change status of a car



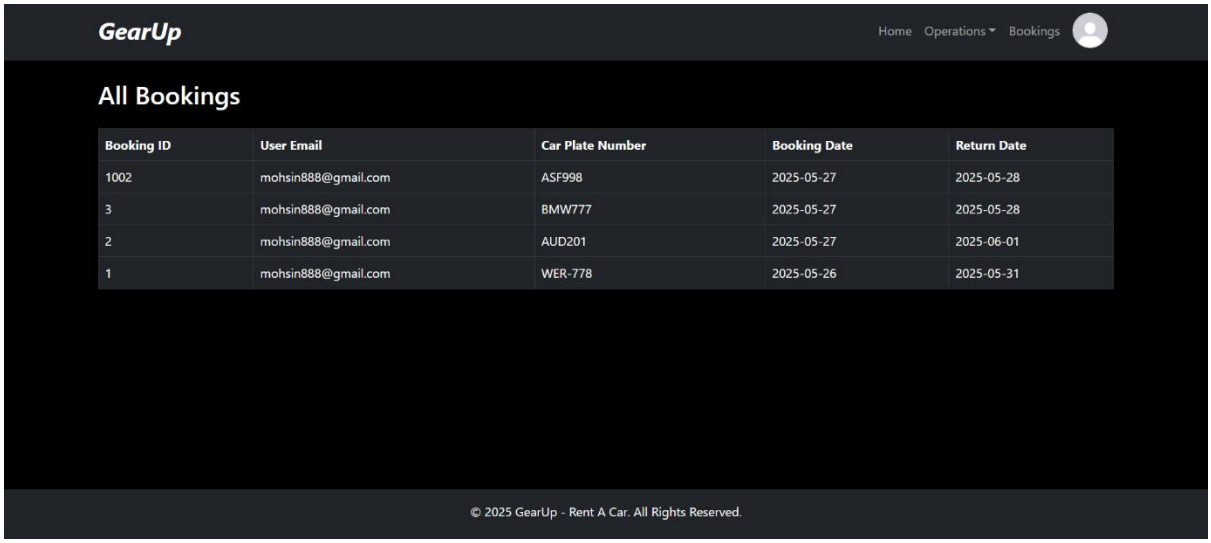


- View a list of all available cars.



12. **Booking Management:**

    - View and track all customer bookings.



| Booking ID | User Email | Car Plate Number | Booking Date | Return Date |
|---|---|---|---|---|
| 1002 | mohsin888@gmail.com | ASF998 | 2025-05-27 | 2025-05-28 |
| 3 | mohsin888@gmail.com | BMW777 | 2025-05-27 | 2025-05-28 |
| 2 | mohsin888@gmail.com | AUD201 | 2025-05-27 | 2025-06-01 |
| 1 | mohsin888@gmail.com | WER-778 | 2025-05-26 | 2025-05-31 |

# 5.Mandatory Requirements

1. **User Authentication:**

    - Customers must sign up and log in to book a car.
    - Admins must log in to access the admin panel.

2. **Role-Based Access Control:**

    - Customers can browse and book cars, while admins manage inventory and bookings.

3. **Database Integration:**

- Securely store user details, car inventory, bookings, and payments.

4. **Cart & Checkout System:**
    - Users must add cars and services to the cart before finalizing a booking.
5. **Car Availability Management:**
    - Cars must be marked as Booked once a booking is confirmed.
6. **Invoice Generation:**
    - Generate itemized invoices for customers, including car rental, add-ons, and delivery charges.

**Expected Outcome**

- A fully functional, user-friendly car rental system with seamless booking and payment processing.
- Role-based dashboard ensuring clear separation of customer and admin functionalities.
- Secure authentication and database management for reliable operations.
- Automated invoice generation for smooth financial transactions.
- A visually appealing and interactive home page for users.
